## Species Requiring Rare Bird Reports to be Submitted to Regional Editor

### Species

Golden Eagle [*Aquila chrysaetos*]

## Special Aspects

BAEA 15 Adult 8, Subadult 4, age unknown 3. GOEA 1 Adult.

Rising caseloads of COVID-19 made this one of the smallest counts in our 50+ year history -- just 14 participants. But those hardy few included many excellent birders, and the relatively warm weather allowed us to cover a lot of ground, despite heavy rainfall in the morning that put a damper on things for a while! We recorded new high numbers of Rock Doves (212), Yellow Bellied Sapsuckers (22) and Winter wrens (7). A pair of Golden Eagles had been seen regularly within the count circle in the weeks leading up to the count, and we were able to track one of them down on count day.
