

Kirtland's Warbler

Unanimously Accepted 7-0

Committee Member Comments:

CM1: This one is a simple one. The bird was extremely well documented, banded, and the identification is unquestioned. Provenance is not an issue for Kirtland's Warblers.

CM2: Absolutely no doubting this record! A bird in the hand with excellent photographs. Outstanding record!

CM3: No doubt ... bird in the hand!

CM4: Photographic evidence. Experienced observer. Multiple observers. Bird in hand.

CM5: A bird in the hand ... report by a competent bander is compelling. The picture confirms that the key characters written in the report are correct for this species. Eight other people observed and confirmed the identification, and one other experienced person signed the form. Concur with HY bird designation.

CM6: Well documented.

CM7: Accepted without comment.
